

Sai Srinivas
Sr. Java/J2EE Developer

Cell: (708) 669-6793

Email: sai.srinivas.2101@gmail.com

Summary:

- **9+ years** of experience in **development** and **implementation** of **Web-based Client-Server** applications using **Java** and **J2EE** technologies.
- Working knowledge in multi-tiered distributed environment, **OOAD** concepts, good understanding of Software Development Lifecycle (**SDLC**) and familiarity of Service Oriented Architecture (**SOA**).
- Expert in **HTML5/CSS3** development and have experience in **Backbone.js**, **Require.js**, **node.js**, **angular.js**, **Grunt js**, Responsive design.
- Expertise in application development using **JSP**, **Servlets**, **JDBC**, **JNDI**, **spring**, **Hibernate**, **JSF**, **EJB2.0/3.0**, **XML**, **Web Services- SOAP**, **WSDL**.
- Expert in **HTML5/CSS3** development and have experience in **Angular.js**, **Node.js**, **Backbone.js**, **Knockout.js**, Responsive design.
- Experienced as a Java/J2EE programmer, developing applications using **Servlets**, **JSP**, **Struts**, **RMI**, **JDBC**, **Hibernate** and **MVC**.
- Experience in working with **java** for writing custom **UDFs** to extend **Hive** and **Pig** core functionality.
- Expertise in **XML** and related technologies like **XSL**, **XSLT** and parsers like **JAXP (SAX, DOM)** and **JAXB** Experience in **Database Design, Creation** and **management of Schemas**, writing **Stored Procedures**, functions, **Triggers**, **DDL**, **DML SQL** queries. Experience in writing **SQL** and **PL/SQL** programming.
- Involved in building and deploying Apache **ANT/ MAVEN** scripts for deployment and customizing **WAR/ JAR** file management for web applications.
- Extensive experience in developing GUI using **HTML**, **CSS**, **JQuery**, **JavaScript**, **JSF/Prime Faces**, **Angular JS**, **Bootstrap JS** and **AJAX**.
- Responsible for setting up **Angular JS** framework for UI development. Developed html views with **HTML5**, **CSS3**, **JSON** and **Angular.JS**.
- Architecting and implementing **Portfolio Recommendation Analytics Engine** using **Hadoop MR**, **Oozie**, **Spark SQL**, **Spark Mlib** and **Cassandra**.
- Expertise in using configuration management tool like **CVS** and **GIT** for version controlling.
- Expert in Various **Agile** methodologies like **SCRUM**, **Test Driven Development**, **Incremental and Iteration methodology** and **Pair Programming** as well as implementing **Waterfall model**.
- Knowledge of **Multithreading/synchronization**, **NoSQL Database: MongoDB**.
- Experience in using **PL/SQL** to write **Stored Procedures**, **Functions** and **Triggers**.

- Excellent technical and analytical skills with clear understanding of design goals of ER modeling for **OLTP** and dimension modeling for **OLAP**.
- Strong expertise on Amazon AWS EC2, S3, Kinesis and other services.
- Strong experience in migrating data warehouses and databases into Hadoop/NoSQL platforms.
- Experience includes Requirements Gathering, Design, Development, Integration, Documentation, Testing and Build.
- Experience in working with Map Reduce programs, Pig scripts and Hive commands to deliver the best results.
- Experienced in Collected logs data from various sources and integrated in to HDFS using Flume and experience in developing custom **UDFs** for **Hive**.
- Experienced in testing data in **HDFS** and **Hive** for each transaction of data.
- Experienced in importing and exporting data using **Sqoop** from **HDFS** to **Relational Database Systems** and vice-versa.
- Experienced with **Akka** building high performance and reliable distributed applications in **Java** and **Scala**.
- Knowledge and experience in job work-flow scheduling and monitoring tools like **Oozie** and **Zookeeper**.
- Hands on experience in Core Java, Servlets, JSP, JDBC, C#, JavaScript.
- Knowledge of Eclipse tool for the development of Java projects.
- Hands on experience Struts and Spring.
- Good experience in **Shell programming**.
- Knowledge in configuration and managing - Cloudera's Hadoop platform along with **CDH3&4 clusters**.
- Experienced in developing web based GUIs using **JavaScript, JSP, HTML, JQuery** , XML and CSS.

Technical Skills:

• Java/J2EE Technologies: JDBC, Java Script, JSP, Servlets, JQuery
• Languages: Java, J2EE, PL/SQL, Pig Latin, HQL, R, Python, XPath, Spark
• Frameworks: MVC, Struts, Spring, Hibernate.
• Databases: Oracle 12c/11g/10g/9i, Microsoft Access, MS SQL
• No SQL Databases: Cassandra, mongo DB
• Web Technologies: HTML, DHTML, XML, XHTML, JavaScript, CSS, XSLT, EME AWS.
• Web/Application servers: Apache Tomcat6.0/7.0/8.0, JBoss
• Operating Systems: UNIX, Ubuntu Linux and Windows, Centos, Sun Solaris.
• Network protocols: TCP/IP fundamentals, LAN and WAN.

- **Hadoop/Big Data:** MapReduce, HDFS, Hive, Pig, HBase, Zookeeper, Sqoop, Oozie, Flume, Scala, Akka, Kafka, Storm, MONGODB.

Professional Experience:

BNFS, Fort Worth, TX

Sr. Java/J2EE Developer

Sep. 16 - Present

Responsibilities:

- Designed use cases for the Application as per the business requirements.
- Participated in requirement gathering and framework implementation sessions through Agile TDD methodology.
- Experienced developing against SOLR Search Platform APIs
- Developed and deployed solution using several new technologies, including Linux - Ubuntu, Drupal and Apache SOLR.
- Developed and delivered **SOAP** based Web Services for our new clients used Apache-CXF and **SOAP** UI to test the services.
- Experience in creating Models, Controllers, Templates, Custom Directives, Components, Filters and Services in **Angular.JS**.
- Extensively used Core **Java** such as **Exceptions**, and **Collections**
- Used JSTL and developed required tiles and tile definitions for templating and defined configuration in the struts configuration.xml.
- Created reusable **Angular.js** html templates using custom templates.
- Resolve Micros xStore issues, **restore** databases, re-image and replace devices
- Processing data ingestion and entity resolution using **Hadoop and Pig**.
- Applied **Hadoop MapReduce** to reduce processing time from two weeks per year of data to one day.
- Experience with **Core Java** with **Multithreading**, **Concurrency**, **Exception Handling**, File handling, IO, Generics, **Data structures** and Collections, Garbage Collection.
- Tackle highly imbalanced Fraud dataset using undersampling with ensemble methods, oversampling and cost sensitive **algorithms**.
- Developed business layer using **EJB** stateless session beans and deployed on the Application server (Web logic).
- Built restful web services using **MongoDB/Node.JS** and implemented the front-end using **jQuery** and **Angular.JS** controllers, directives, and service.
- Created Composite Applications, Home Security components and Adapters by using Oracle SOA technology.

- Developed major websites and services by including **Mongo DB** as backend software.
- Implemented various screens for the front end using **React.js** and used various predefined components from NPM (Node Package Manager) and redux library.
- Configured servlets, java classes, Spring Framework, Hibernate, database drivers, data sources related to project.
- Strong expertise on Amazon **AWS** EC2, S3, Kinesis and other services.
- Worked on Integration of Spring and **Hibernate** Frameworks using Spring ORM Module.
- Manage day to day operations of the PPM application and their associated SLA's.
- Provide ongoing support of vertical PMO groups relative to PPM and D&B's SDLC policy.
- Configured CA Clarity PPM application to support ongoing business initiatives and processes.
- Experience in **AWS**, implementing solutions using services like (EC2, S3, RDS, Redshift, VPC).
- Developed the front end user interfaces using JSP, JSTL, **JQuery** , **Java Script**, **AJAX**, JSON, HTML, Angular JS and **CSS**.
- Use Java, J2EE technologies to develop UI and server side components. Use Struts and Spring framework to implement **MVC** design patter.
- Developing the components using advanced **Java 8** concepts like Stream API and Parallel Streams.
- Developed software components for the Microkernel team using **JAVA8 /J2EE**.
- Integrated subsystems using **SOAP** based Web services and Apache Axis2.
- Involved in architecture, design, development of projects in **AJAX** based **Java Script** with Dojo toolkit and JSON API with JSP.
- Implemented Service oriented architecture (SOA) using **RESTful** web services.
- Developed Web Services to create reports module and send it to different agencies and premium calculation for manual classes using **SOAP** and **RESTful** web services and rich faces components.
- Designed and developed a **RESTful** hub application which resolved the Single-Sign-On authentication of the target secured **REST** services.
- Involved in a project Development using Spring Web Flow and Hybris and developed front-end UI with JSF Richfaces, **Backbone.js**, JQuery, CSS3 Dojo and AJAX.
- Involved using **Backbone.Js** for providing a structure to web applications.
- Maintain and developed Mantis bug management system for internal usage, using MySQL/PHP, Bootstrap, **Backbone.js**.
- Experience in performance tuning of **Cassandra** and implementation of agile-scrum methodology and service desk implementing.
- Experienced in job workflow scheduling and monitoring tools like Oozie and Zookeeper.
- Worked on Spark, Scala, Python, Storm Impala.

- Extensive experience in Spark Streaming (version 1.5.2) through core Spark API running Scala, Java to transform raw data from several data sources into forming baseline data.
- Created Hive External tables and loaded the data into tables and query data using **HQL**.
- Experience in different Hadoop distributions like Cloudera (**CDH3 & CDH4**) and Horton Works Distributions (**HDP**) and **MapR**.
- Worked with **AWS** to implement the client-side encryption as Dynamo DB does not support at REST encryption at this time.

Environment: Java, J2EE, JAXB, RESTful, CSS3, JSON, Node.js, React.js, Big Data, Spark, HIVE, Pig, Scala, Python, Hadoop, AWS, Dynamo DB, Kibana, JDBC, Redshift, NOSQL, Data structures, Sqoop, MYSQL.

UST Global, Thousand Oaks, CA

Sr. Java/J2EE Developer

Mar. 15 to Aug. 16

Responsibilities:

- Subject matter expert in enterprise search engine analysis, design, development and systems integration. Search engines include Autonomy IDOL Server, MOSS 2007, Endeca, Lucene/Solr and Microsoft FAST 2010 for SharePoint 2010, SharePoint 2013.
- Responsible for writing J2EE compliant Java code for application development effort which involved working with JSP, Servlets, JDBC, XML, EJB, etc.
- Responsible to maintain HTML5, CSS3 in JQuery as well as keeping the pages dynamic using AJAX, JSON and XML.
- Involved in developing the UI panels using JSF, XHTML, CSS, DOJO and JQuery
- Experience in using design patterns and UI frameworks such as MVC, Struts, Hibernate, NodeJS, Spring.
- Enhanced user experience by designing new web features using MVC Framework like Backbone.js, Require.js and Node.js.
- Experience in developing scalable front-end user interfaces using HTML, CSS, and JavaScript, JQuery, Angular.JS and Mongo DB.
- Worked with NO SQL and **Big data** technologies such as **Mongo db, Cassandra, Hadoop** and Docker.

- Used Spring Data Mongo DB as the persistence framework in retrieving the user and medical benefits details from Mongo DB.
- Strong understanding of Hadoop eco system such as HDFS, MapReduce, HBase, Zookeeper, Pig, Hadoop streaming, Sqoop, Oozie and Hive.
- Used **React JS** and **Node JS** to develop faster, scalable application.
- Extensively used **React JS**, **Node JS**, **Backbone JS**, **Angular JS**, **JavaScript**, **Typescript** and **jQuery** to provide UI functionality.
- Responsible for developing a front-end application using **React JS** and Flux architecture for internal teams productivity use.
- Used Web services and **Dozer** mapping for backend mapping and UI, Business services mapping.
- Built data visualizations to monitor file server load, web server speeds, data processing and more using D3, **Backbone.js**.
- Created web application prototype using jQuery and **Backbone.Js**.
- Migrated CareFirst's My Account Java stack pages into **React.js** stack.
- Used **React JS** for templating for faster compilation and developing reusable components.
- Optimize **algorithm** with stochastic gradient descent algorithm Fine-tuned the algorithm parameter with manual tuning and automated tuning such as Bayesian Optimization.
- Worked closely with the Business/Users team in translating technical requirements into application code
- Developed web layer using **Struts** framework to manage the project in **MVC** pattern.
- Implemented integration of Struts **Action classes** in Presentation Tier.
- Utilized **Node.js** to create a fast and efficient chat server.
- Used **Struts Tiles** Framework for designing the layout of the application.
- Designed dynamic and multi-browser compatible pages using **HTML5**, **CSS3**, **jQuery** and **JavaScript**
- Used Hibernate as persistence framework for **DAO** layer to access the Oracle10g database.
- Worked on **Eclipse** for development and deployment of application in **Web Logic** Application Server.
- Creating **Angular** Services using factory services to implement the business logic.
- Responsible for coding, testing and documenting various packages, procedures, and functions for libraries.
- Proficient in using SVN for Version Control.
- Actively involved in code reviews and also in bug fixing.
- Implemented Installation and configuration of multi-node cluster on Cloud using Amazon Web Services(**AWS**) on EC2.

- **AWS** Cloud and On-Premise environments with Infrastructure Provisioning / Configuration.

Environment: Java, JSP, JavaScript, Ajax, JQuery, Ant, **Elastic**, Struts, POS, DOJO, Drools, Hbase, Solr, Marklogic, Spring , MICROS, Hibernate, RSA, WebSphere Application Server, AWS, DB2, Agile, XML, LDAP.

Comerica, Dallas, Texas

Sr. Java/J2EE Developer

June 14 to Feb.16

Responsibilities:

- Implementing Spring MVC and IOC methodologies.
- Development, enhancement and testing of the Web Methods flow services and Java services.
- Used web services for interaction between various components and created SOAP envelopes.
- Paypal had their own application stack for REST based Java application, understood their architecture before design and development.
- Used Spring MVC, IOC and Eclipse IDE, GitHub, JSF, D3.js, OOAD, **AWS**, RCP, SPA, Python, Hibernate, Multithreading, NetBeans to develop intranet web application.
- Proficient coder in multiple languages and environments including Python, Django, C, C++ and SQL.
- Hands on experience in Html, CSS Java Script, BootStrap, Ajax, php.
- Created frontend screens using GWT framework.
- Experience in working with the NoSQL, Mongo DB, and Apache Cassandra.
- Resolving scalability and performance issues both in Applications as well as in Web sphere/Web Logic Application Servers.
- Experience in developing Web based GUI's using JSP, HTML, DHTML, CSS, JavaScript (and its frameworks like JSON), Action Script, DOJO, Node JS, Angular JS, JQuery, EXT JS and Ajax.
- Experience in web applications creation with HTML5, Ajax, JQuery, Backbone.js, and CSS3.
- Performed UNIX Shell scripting for the application.
- Experience in development of JavaScript for client side validations.
- Designed/developed UI with AJAX, HTML, DHTML and JavaScript for interactive web pages.
- Design the J2EE components of the Restful Web Services and scheduled Java batch jobs based application in UML.

- Created Web Services (SOAP) between different components and also exposed few web services to client apps get metadata for the specific entities and documents.
- Developed common reusable component libraries (CRUD Scaffolding) to be reused in different projects throughout the company's IT team using GWT, Sencha, Spring data, JPA.
- Implemented application specific exception handling and logging frame work using **Log4j**
- Involved in developing the component which provides the required information to Reporting system to generate the trend analysis reports for user attempts, success, user failures and system failures.
- Involved in complete development of '**Agile** Development Methodology/**SCRUM**' and tested the application in each iteration.
- Involved in with xml, **MVC**, **Backbone**, svn **Synfony2**.
- Improve the performance of the application by using the Performance Tuning and Time lines for each module of the Application. Based on Time lines decrease the page loads and increase the total performance of the application.
- Implemented **Core Java** Methodologies like Interfaces, Collections, Customized Exceptions and **Multi-Threading**.
- Designed and developed the process of synchronizing and Multi-Threading for each module of the application.
- Experiences in Web Programming and User Interface Development having hand on experience on **python**, **MySQL**.
- Programming experience in **node.js**, **mongo db**, **java** and **MySQL**.
- Solved Production Support defects by using tool **HP Tracing**. Based on priority of the defect solve the all production support defects.
- Used Subversion for activities tracking Version Controlling and Change Management that is tracking structure of folders, maintaining global revision number for the whole repository and **Clear Case** operations.

Environment: Java, J2EE, Servlets, JSP, **HTML**, **DHTML**, **JavaScript**, **CSS**, **AJAX**, **JQuery**, **XML**, **XSLT**, **Eclipse**, **Spring Web MVC**, **Hibernate**, **WebLogic**, **SOAP**, **JAXP**, **JAXB**, **Oracle**, **SQL** , **JUNIT**.

Signature Bank, New York, NY

Sr. Java Developer

Mar.12 to May 14

Responsibilities:

- Worked on Java and JSON, to interact and get the data from csv files as we are prototyping the user Experience.
- Experienced in developing Web Services with Python programming language.
- Experience in build management with Ant Script
- Developed the application using Struts Framework that leverages classical Model View Controller (MVC) architecture.
- Front end design using HTML CSS Bootstrap.
- Implemented Business processes such as user authentication, Account Transfer using Session EJBs.
- Extensively developed stored procedures, triggers, functions and packages in oracle SQL, PL/SQL.
- Developed the front end using HTML, JavaScript, AJAX, JSP, CSS, JQuery, and XML.
- Developed POJO's, Data Access Object (DAO) which handles all database operations using Hibernate.
- Developed and configured Oracle Database 10g tables including Sequences, Functions, Procedures and Table constraints.
- Experience in using design patterns and UI frameworks such as MVC, Struts, Hibernate, NodeJS, and spring.
- Strong knowledge in developing and designing web 2.0 application according to Information architecture and Usability standards using Ajax, JQuery, Backbone.js, XML, Symfony 2, CSS3 and MVC frameworks.
- Implementation of the Business logic layer for Mongo DB Services.
- Implemented the Animation and styling using CSS3 and JQuery.
- Developed logging module-using Log4J to create log files to debug as well as trace application.
- Developing data access layer using IBATIS -ORM and JDBC.
- Involved in JUnit Testing, debugging, and bug fixing.
- Used Log4j to capture the log that includes runtime exceptions and developed WAR framework to alert the client and production support in case of application failures.

Environment: Java, J2EE, Servlets, JSP, HTML, DHTML, JavaScript, CSS, AJAX, JQuery, XML, XSLT, Eclipse, Spring Web MVC, Hibernate 4.0, WebLogic 10.3, WSDL, SOAP, JAXP, JAXB, Oracle 11g, SQL, HP Quality Center, JUNIT, Ant.

PRIMIER SOFTWARE, Bangalore

Java Developer

Sep.08 to Feb.12

Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development.
- Developed a prototype of the application and demonstrated to business users to verify the application functionality.
- Developing front end of application using HTML, CSS, backbone.js, javascript, jQuery.
- Design, develop and implement MVC Pattern based Keyword Driven automation testing framework utilizing Java, JUnit and Selenium WebDriver.
- Used automated scripts and performed functionality testing during the various phases of the application development using Selenium.
- Used Angular js framework where data from backend is stored in model and populated it to UI.
- Prepared user documentation with screenshots for UAT (User Acceptance testing).
Environment: Java, Javascript, HTML, CSS, Xpath, Selenium Webdriver, Eclipse, JUnit, Jmeter, Jira, Windows, Mac OSX, Oracle 10g, Agile Methodology.
- Developed and implemented the MVC Architectural Pattern using Struts Framework including JSP, Servlets, EJB, Form Bean and Action classes.
- Hands on experience with MVC Javascript frameworks such as Backbone.js, Angular.js and Node.js.
- Implemented server side tasks using Servlets and XML.
- Helped developed page templates using Struts Tiles framework.
- Implemented Struts Validation Framework for Server side validation.
- Developed JSP's with Custom Tag Libraries for control of the business processes in the middle-tier and was involved in their integration.
- Implemented Struts Action classes using Struts controller component.
- Developed Web services (SOAP) through WSDL in Apache Axis to interact with other components.
- Implemented EJBs Session beans for business logic.
- Used parsers like SAX and DOM for parsing xml documents and used XML transformations using XSLT.
- Wrote stored procedures, triggers, and cursors using Oracle PL/SQL.
- Created and deployed web pages using HTML, JSP, Javascript and CSS.
- Wrote JUnit Test cases for performing unit testing.
- Used Rational Clear Case as Version control.
- Implemented Java/J2EE Design patterns like Business Delegate and Data Transfer Object (DTO), Data Access Object and Service Locator.
- Interact with clients to understand their needs and propose design to the team to implement the requirement.
- Built Angular js framework including MVC architectures, different modules, specific controllers' templates, custom directives and custom filters.

Environment: Java, JSP, JDBC, Spring Core , Struts , Hibernate , Design Patterns, XML, Oracle, PL/SQL Developer, Web services, SOAP, XSLT, Jira.
